### WHEELS & TIRES

|           | Front               | Rear                  |
|-----------|---------------------|-----------------------|
| Tire type | <u>TRC<br/>Pink</u> | <u>Jaco<br/>Green</u> |
| Tire dia  | <u>@2.30"</u>       | <u>@2.30"</u>         |
| Stagger   | <u>n/a</u>          | <u>n/a</u>            |
| Car width | <u>standard</u>     | <u>standard</u>       |
| Wheels    | <u>TRC</u>          | <u>Jaco</u>           |

Chassis: STD

Car body: Protoform Peugeot 905b MD

Wing/spoiler: side dams only

Motor: Reedy Ti 9x2

Pinion: 15 Spur gear: 84

Battery type: Orion Sanyo 3000HV

Indicate battery placement:  
(Rearmost 3 holes on each side.)

Futaba 3PD radio, AIR737 servo, LRP Quantum Pro Speed Control.

Rear axle: STD

Tire treatment type Zip Grip 2

Shade in amount of tire treatment: (Full coverage)

On Road Track Conditions: Asphalt, clean, smooth, and high-bite for an outdoor track. Unsprayed. Track is 200'x100' big. "Summer" layout.

Race Comments: TQ'd and won.

Car Comments: Will push for the first lap and go loose around the last lap. Otherwise very well balanced and fast setup for Pro10 mod. on this 1/8<sup>th</sup> scale gas oriented track. This setup is specifically to use Pink front tires with Green or Aqua rears.
