

### Associated TC6 Arm mount table

Mount Block (Dots)	Bulked position	Rollcenter Position	Roll center	
3	B	2.92mm above 0	 Highest	
2	B	2.03mm above 0		
1	B	1.27mm above 0		
0	B	0mm		
3	A	.533mm below 0		
2	A	1.42mm below 0		
1	A	2.18mm below 0		
0	A	3.45mm below 0		
				Lowest

In general, lower roll centers will effectively make the car softer in roll, allowing the car to lean more in the corners. Lower roll center positions are good for low traction conditions. If the grip level is high, then raising the roll centers to a higher position will help to stiffen the car in roll making it more stable.
