Results	
Qualifying Position	
Finishing Position	
Time / Laps	
Fast Lap	

## Comments & Notes

The base setup is the same for Carpet and Asphalt.

For Asphalt apply Paragon Ground FX for 15 min then apply any runny white spf 45 sunscreen lotion over the same area let it soak in for 15-30 min then wipe off thoroughly with a rag.

For Carpet use Paragon Ground Effects or whatever traction compound is used in your area.
