TIRE ☒ Schumacher mini spike (Yellow)  
 INSERTS ☒ dBoots medium  
 WHEELS ☒ AE Rear

## OTHER

### COMMENT

Editable: Arn0 at PetitRC.com

30g Thin lead plate under servo  
 20g on chassis in front of servo  
 75g lead plate under lipo

Tons of Steering.  
 Rear end slightly loose on power off tight apex's, but good drive once stable.  
 Good over bumps.

Work in progress!
