COMMENT

Editable: Arn0 at PetitRC.com

Carpet is a mix of Ozite and random low-pile stuff. Club race TQ and win on date of setup sheet. Front bulkhead is the 45g steel one. 10g weight by battery is 5g on each side of pack and is solely to settle the car better on jump landings. Car is faster without it in the corners but a lack of hittable downsides to some jumps on some layouts is why it is on there. Futaba BLS551 servo. Car is 1542g RTR.
