HEAVE SHOCK

Spring _____ **Oil** _____ **Preload** _____

A detailed line drawing of a shock absorber. It features a central cylindrical body with a piston rod extending from each end. The piston rod on the left is threaded and has a large circular eye for mounting. The piston rod on the right is also threaded and has a large circular eye. A coiled spring is visible around the central body, and a smaller coil is visible near the right mounting eye. The diagram is used to illustrate the adjustment of the spring, oil, and preload settings.

Chassis

☐ Carbon ☐ Alu Liniar Flex

The diagram illustrates the assembly of a Topdeck chassis. It includes a front/rear view, a one-piece view, and a one-piece zero-hole view. Dimensions are provided in millimeters. The chassis is shown with various components like the front/rear, one-piece, and one-piece zero-hole. The chassis is labeled with 'Steel', 'Alu', and 'Carbon' options. The chassis is shown with various components like the front/rear, one-piece, and one-piece zero-hole. The chassis is labeled with 'Steel', 'Alu', and 'Carbon' options. The chassis is shown with various components like the front/rear, one-piece, and one-piece zero-hole. The chassis is labeled with 'Steel', 'Alu', and 'Carbon' options.
