### Caution

If you make changes or adjustments not shown in the instruction manual, your vehicle may be damaged. To prevent any serious personal injury and/or damage to property, please be responsible when operating all remote controlled models. Extra attention is called for when operating any glow fuel powered model. These models can exceed speeds of 30 m.p.h. and use highly poisonous and flammable fuels.

#### Before Running

- Please read manual (with parent, guardian or a responsible adult if necessary).

#### While Operating

- Please do not run on a public street, this could cause serious accidents, personal injuries and/or property damage.
- Please do not run near pedestrians or small children.
- Please do not run in small or confined areas.

#### Before Operating

- Make sure that all screws and nuts are properly tightened.
- Always use fresh batteries for your transmitter and receiver to avoid losing control of the model.
- Make sure no one else is using the same radio frequency as you are using.
- Please confirm the neutral throttle position.

#### After Running

- Shut off engine first, then turn off receiver switch and turn off transmitter last.
- After running, it is necessary to perform routine maintenance. Failure to do this can result in increased wear and damage to the engine and chassis.

#### Heat, Fire, and Fuel Safety

- Never use gasoline in a glow engine. Use glow fuel specifically designed for model car engines.
- Do not run near open flames or smoke while running your model or while handling fuel.
- Always store fuel in a well ventilated place, away from heating devices, open flames, direct sunlight, or batteries. Keep glow fuel away from children.
- Glow fuel is flammable and poisonous. Glow fuel powered model engines emit poisonous vapors and gasses. These vapors irritate eyes and can be highly dangerous to your health.
- Be aware that some parts will be hot after operation. Do not touch the exhaust or the engine until they have cooled.

Si vous apportez des modifications ou faites des réglages qui ne sont pas indiqués dans le manuel d'instruction, votre véhicule pourrait être endommagé. Pour éviter toute blessure corporelle et/ou dommage aux biens, veuillez agir d'une façon responsable lorsque vous faites fonctionner des modèles réduits télécommandés. Une attention particulière est nécessaire lorsque vous utilisez un modèle thermique. Ceux-ci peuvent atteindre des vitesses de 50 km/h et utilisent des carburants hautement toxiques et inflammables.

#### Avant de faire courir le véhicule

- Veuillez lire le manuel avec un parent ou un adulte responsable.

#### Lors du fonctionnement

- Veuillez vérifier la position neutre de l'accélérateur.

#### Après l'arrêt

- Éteignez d'abord le moteur, puis le récepteur, et éteignez l'émetteur en dernier.
- Après avoir roulé, il est nécessaire d'effectuer un entretien de routine. Ne pas le faire résulterait erait en une usure plus importante et des dommages au moteur et au châssis.

#### Sécurité du carburant contre l'incendie

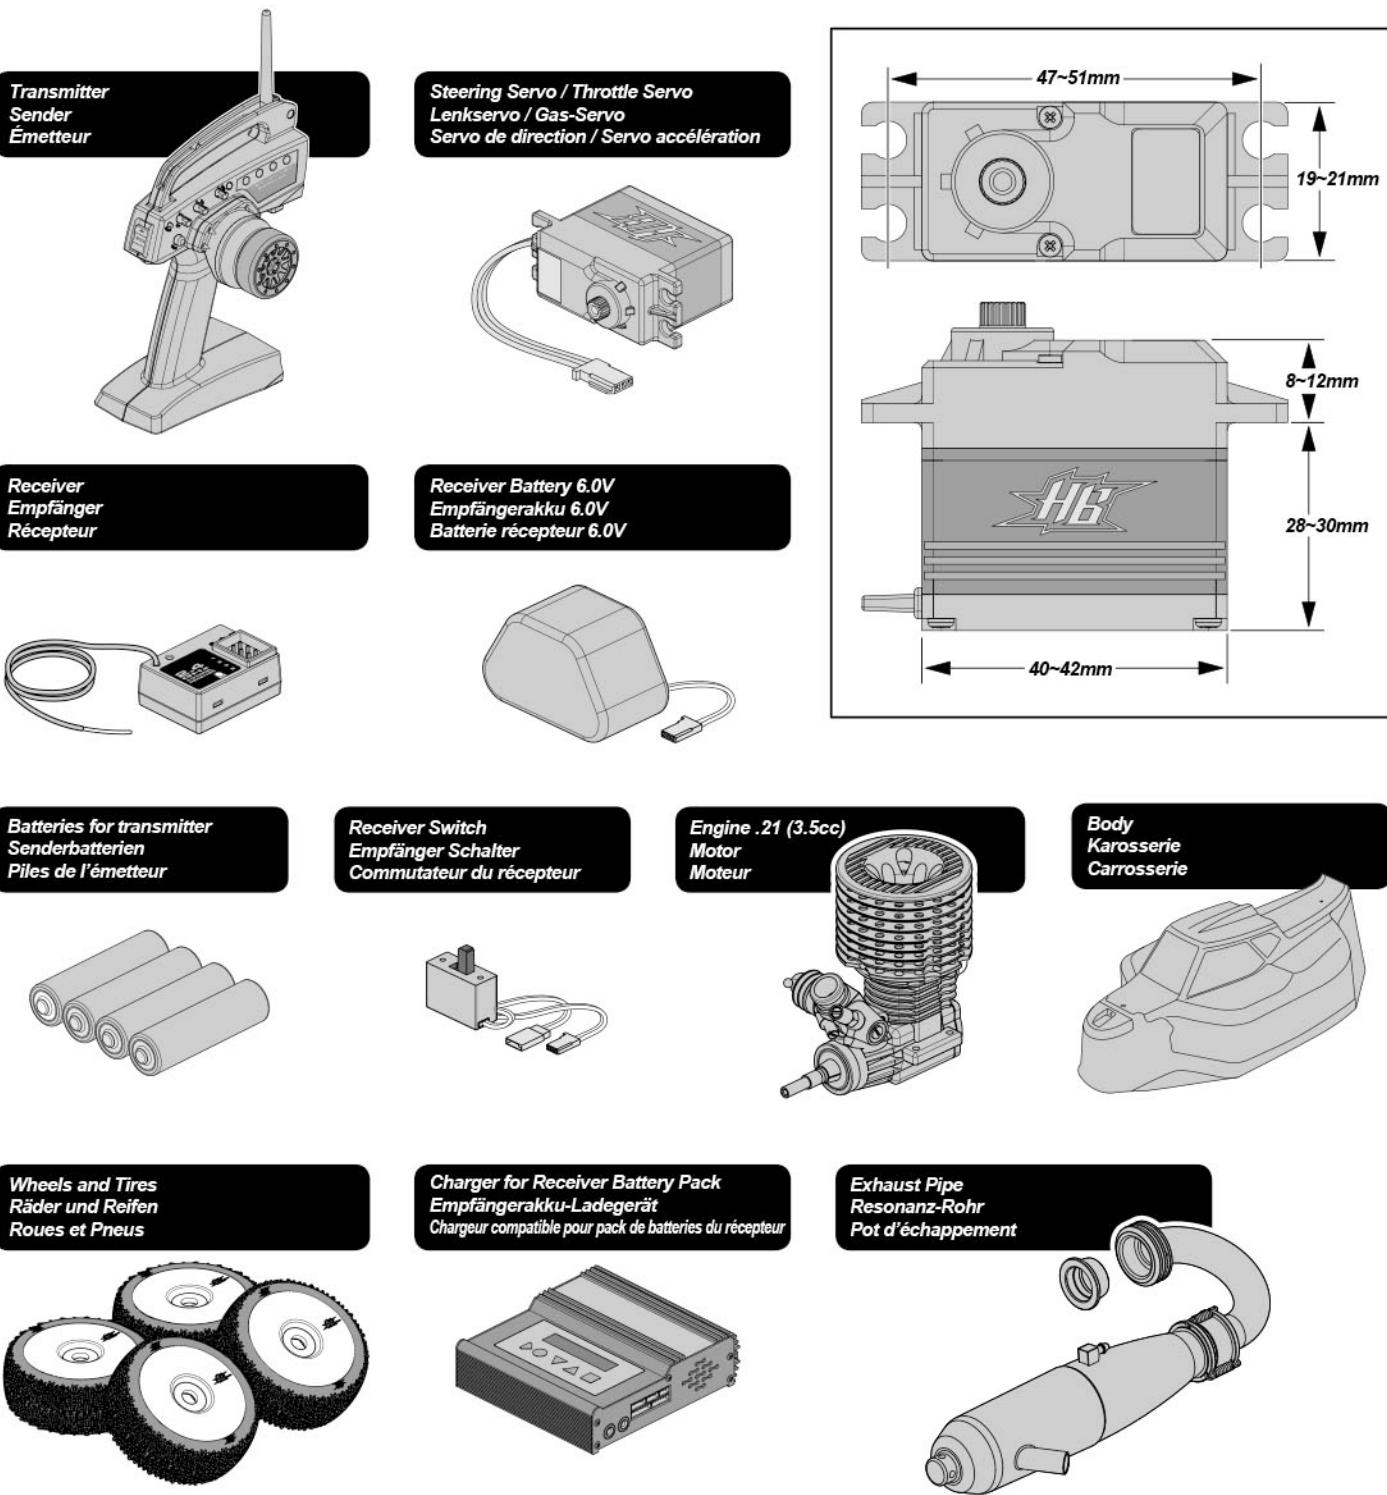

- N'utilisez jamais d'essence dans un moteur thermique. Utilisez du carburant spécialement conçu pour les moteurs de modèles réduits.
- Ne faites pas fonctionner près de flammes nues et ne fumez pas pendant que vous faites courir votre modèle réduit ou que vous manipulez du carburant.
- Conservez toujours le carburant dans un endroit bien ventillé, loin des appareils de chauffage, des flammes nues, de la lumière du soleil directe ou de batteries. Conservez le carburant hors de la portée des enfants.
