SCREW USED ●

SCREW NOT USE ○

The diagram illustrates the chassis flex for two configurations: Kit Chassis and Op Chassis. The Kit Chassis configuration shows a small rectangular chassis with four screws (two on the left, two on the right) marked with solid red circles (●), indicating they are to be used. The Op Chassis configuration shows a larger rectangular chassis with eight screws (four on the left, four on the right) marked with open circles (○), indicating they are not to be used. A legend at the top right defines the symbols: a solid red circle (●) for 'SCREW USED' and an open circle (○) for 'SCREW NOT USE'.
