INSTRUCTION MANUAL

S35-GTE

1/8 Scale 4WD Brushless Power On-Road GT Car

INTRODUCTION

Based on the latest SWORKz S35-3E platform, SWORKz further developed and improved the E-GT and came up with the S35-GTE.

The S35-GTE is the ultimate SWORKz 1/8th electric on road GT car at this moment. Its new rear suspension design and front ackerman steering system came directly from the 1/8th S35-3E electric buggy. A new center transmission system gives all round improvements to the S35-GTE.

The S35-GTE newly designed arms are made from a strong standard nylon material. Optional carbon covers are available to adjust the arm's stiffness.

A new front Ackerman steering system and new front shock tower design allow you to change the front upper angle positions with ease.

The T-7075 aluminum chassis with its new design L.F.C (Lower Friction Coefficient) system will give more grip and at the same time less friction for the rear.

The S35-GTE includes high quality parts, a refined shock system and many option parts.

The SWORKz S35-GTE Pro Kit comes standard with many SWORKz Factory Team Option Parts.

SWORKz utilizes only the highest quality materials and industry leading manufacturing processes resulting in a faster, stronger, and more reliable vehicle. The S35-GTE Pro Kit has been designed to win races.

Congratulations on your purchase of the new SWORKz S35-GTE 1/8 scale on-road racing GT pro kit.

Please read this manual thoroughly before you attempt to start running your S35-GTE. This manual contains step-by-step instructions to help you complete, prepare for startup, and fine-tune your Buggy. Updates, setups, and product news will be posted on our website (www.sworkz.com) or SWORKz RC Face Book page.

As always, if you should ever have any questions or need help with your S35-GTE, please feel free to contact our official SWORKz dealers and distributors, as they will be glad to help you. You may also contact us at any time for the most up to date information and support.

S35-3/E Steering curve ball end additional manual

We suggest when you are using the back holes for the S35-3 and S353/E steering ackerman plate, try using the curve ball plastic end on the outside steering linkage ball. This way the steering will improve and the response will be smoother, there will not be any over angle.
