

XRAY XB4

The diagram illustrates a chassis flex assembly with various adjustment points. A legend on the left defines the symbols for 'CHASSIS FLEX': a solid red circle for 'SCREW USED' and an open circle for 'SCREW NOT USED'. The assembly is shown from a top-down perspective, with 'FRONT' and 'REAR' labels at the bottom. Four balance points are indicated by boxes labeled 'BALANCE' with a 'g' unit. The top-left and bottom-right boxes are empty, while the top-right and bottom-left boxes show a value of '20'. A 'BRACE' section on the right has a 'YES' checkbox (unchecked) and a 'NO' checkbox (checked with an 'X'). The diagram shows several screws (red circles) placed at various locations along the chassis flex, with lines connecting them to the balance and brace adjustment points.
